\* Cases not available.

NEW DELHI 3 (INDIA); }

The 19th June, 1950. }

S. P. JAIN,

for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4½% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 27th May, 1950.—contd.

\*In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

†Figures not available.

Explanation of symbols used:—B.=Births ; B.R.=Birth rate ; C.=Cholera ; S.=Smallpox ; P.=Plague ; F.=Fever ; D. D.=Dysentery and Diarrhoea ; R.D.=Respiratory diseases ; M.D.=Maternal Deaths ; D.R.=Death rate ; I.D.=Infantile Deaths (included in total Deaths).

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 27th May, 1950, relate to 157 towns with an estimated population of 18,021 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 67% of the total number of towns representing 64% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 10,400 and 7,843 representing birth and death rates of 30.0 and 22.6 per thousand of population respectively.

(A) States (Parts A & C) :—The data here relate to 140 towns with an estimated population of 16,035 thousands. Information about Assam, Bihar, Madhya Pradesh and West Bengal could not be included. The total number of towns is 201 and their population is 24,868 thousands. Thus 70% of the total number of towns representing 65% of the total population is covered. The numbers of births and deaths recorded in these towns were 92,44 and 7,111 representing birth and death rates of 39.9 and 23.0 per thousand of population respectively. The table at the end gives the position by states.

The towns of Ooty in Madras, Banaras, Etawah, Faridabad-Fatehgarh, Hathras, and Sambhal in Uttar Pradesh recorded high death rates of 57.9; 51.7; 55.6; 54.4; 68 and 55.3; per thousand of population respectively. In Ooty the high death rate was mainly due to respiratory diseases. The high death rates in all other towns were mainly due to deaths from fevers. Death from dysentery and diarrhoea and respiratory diseases in Banaras were considerably high.

(B) States (Part B) :—The data here relate to 17 towns with an estimated population of 19,56 thousands. The total number of towns is 32 and their population is 3,783 thousands. Thus 53% of the total number of towns representing 52% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,156 and 1,111 representing birth and death rates of 30.7 and 19.7 per thousand of population respectively. Enakulam in Travancore-Cochin was the only town which had a high death rate of 54.8 per thousand of population and this high death rate was not due to any one of the specified Censes.
